

Godfrey Hirst Adhesive Recommendations

Using a quality adhesive for a commercial application is just as important as choosing the right type of flooring. There is no single adhesive that is recommended for all flooring types and choosing the best one can help your floors last longer and look better.

The table below is a selection of the most compatible adhesives for Godfrey Hirst carpet tile and hard flooring products. These adhesives have been tested in conjunction with the adhesive manufacturers and selected based on a range of factors including the type of flooring, the substrates being adhered to and the amount of traffic the floor may be subjected to.

Selecting the best adhesive for a project is the installers responsibility. If a particular application has unusual site conditions/special requirements and an alternative adhesive needs to be used, you can always check with your preferred adhesive manufacturer or Godfrey Hirst Account Manager.

Godfrey Hirst Product	Adhesive brand and product
